

EU-CARIBBEAN WORKSHOP ON MARINE SCIENTIFIC COOPERATION

COASTAL RESTORATION WITH NATURE AND PEOPLE: the A-AAGORA project living lab concept

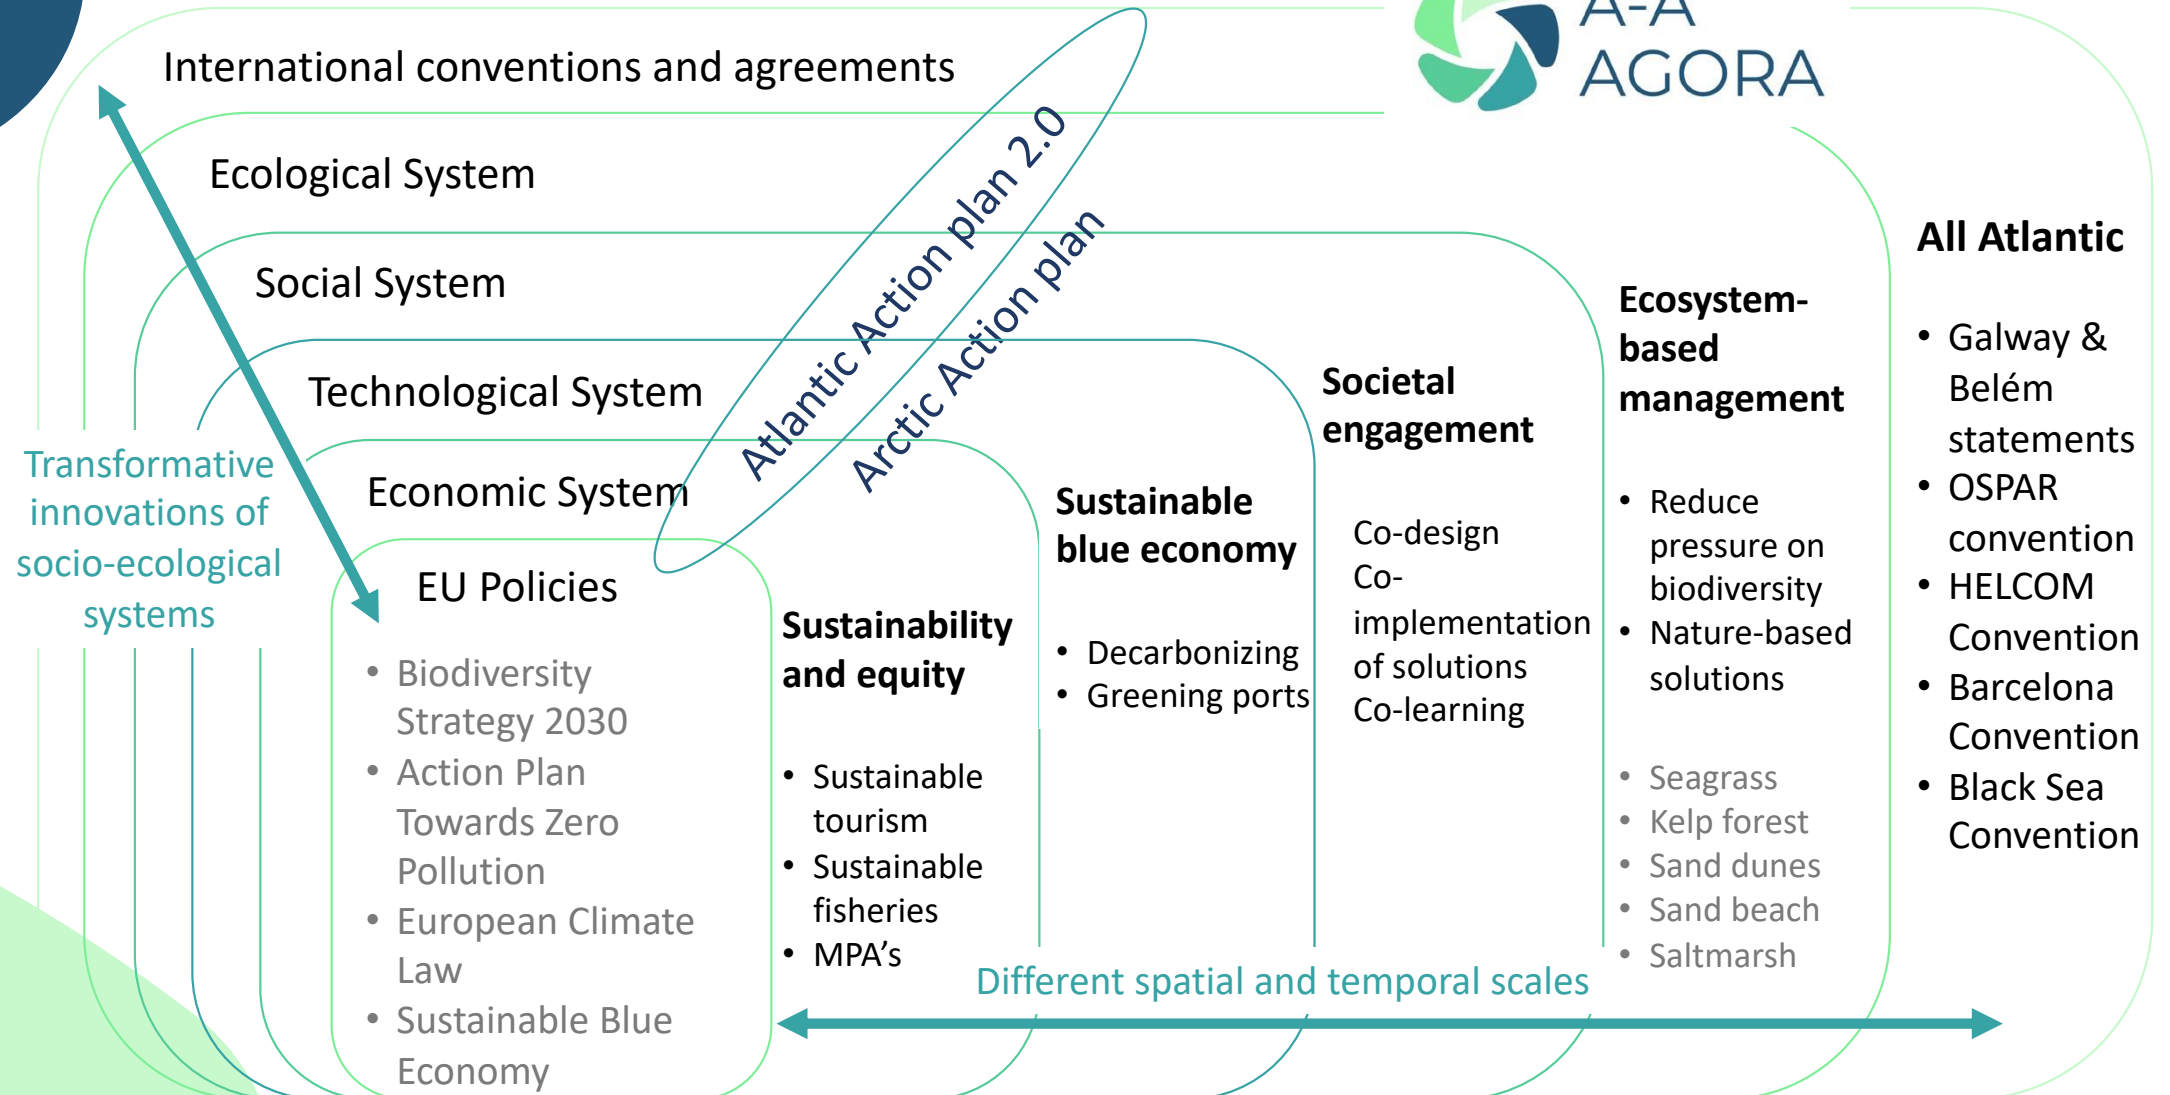

ANA LILLEBØ

EU-CARIBBEAN WORKSHOP
ON MARINE SCIENTIFIC COOPERATION

14-15 November 2023

the context of A-AAGORA

Inspired in the meaning of the word Agora, as existing in ancient Greek cities:

“an open space that served as a meeting ground for various activities of the citizens”

BLUEPRINT FOR ATLANTIC-ARCTIC AGORA

Project Coordinators: **Ana Lillebø**

University of Aveiro, Portugal

Total Cost: 9 778 174.76 €

EC Contribution: 8 362 816. 93 €

Start Date: 01/12/2022

Duration: 42 months

the main objective

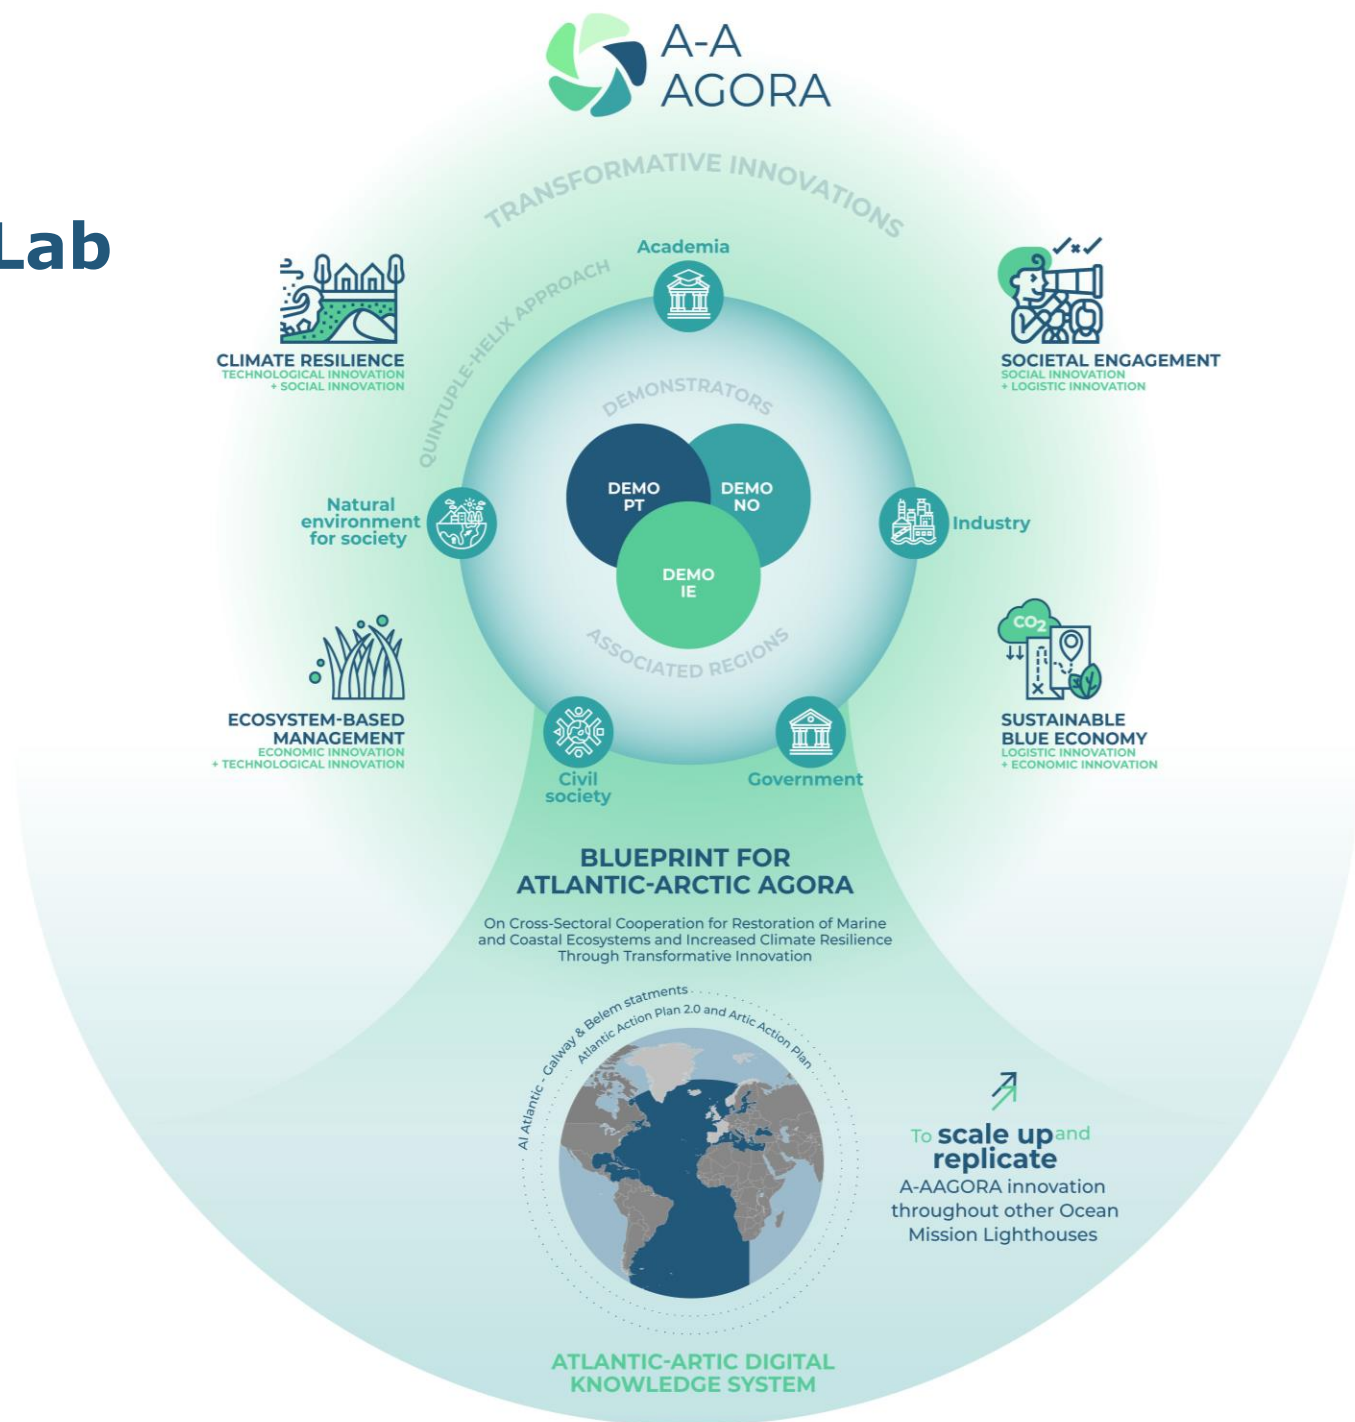

The A-AAGORA main objective is to demonstrate, **via technological, social, logistic, and economic innovation actions**, the reduction of pressures in coastal areas, through the application of ecosystem-based management (**EBM**) and nature-based solutions (**NbS**) to boost resilience to climate change and mitigating its impacts, and to provide **innovative solutions to the market** and **foster deliberative democracy**

the living Lab concept

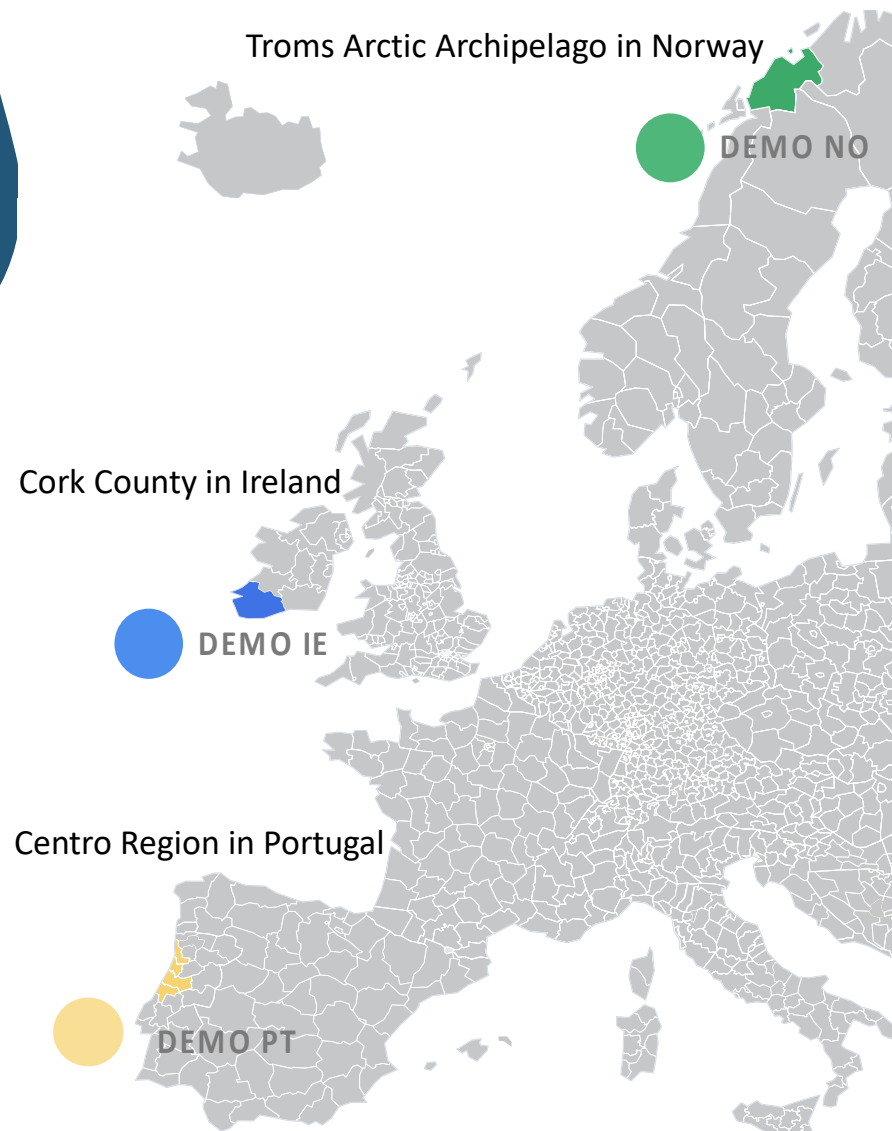

Coastal Restoration with Nature and People

the consortium

The three Demos, representative of the Atlantic-Arctic area, are:

- TROMS Arctic Archipelago in Norway (NUT2 Nord-Norge, code NO07)
- Cork County in Ireland (NUT2 South-West, code IE05)
- Centro Region in Portugal (NUT2 Centro, code PT16)

The three Demos, representing different starting points, act as pilots of innovative actions, providing important data and information from the Atlantic-Arctic basin that can advance global ocean science and direct research in other coastal and marine regions.

associated regions

Associated regions are understood as "*areas with similar ecosystems (e.g., neighbouring regions and/or regions in a different river basin) and/or less-developed regions, to build capacity to implement the innovative solutions.*"

The technical assistance to the '**Associated Regions**' should include the provision of technical advisory services necessary to prepare roadmaps, plans and projects to restore ecosystems in the associated regions addressing possible barriers and showing the feasibility of implementing innovative solutions.

'**Associated Regions**' will become active members of A-AAGORA Community of Practice (CoP), a forum for the exchange of experiences and best practices for sake of the sustainability and extension of its objectives beyond these project's duration.

Source: <https://youtu.be/poZ7Dz4XvI8>

The selected beneficiaries commit to carry out the following activities in their role as an associated region to the A-AAGORA project:

- Participation in workshops and meetings in the scope of A-AAGORA training activities and capacity building sessions;
- Participation in developing blueprints and business roadmaps for the nature-based solutions to be implemented at the replication sites;
- Interact with local stakeholders, in an ecosystem-based management approach, to identify restoration needs in the replication area;
- Pilot testing of the A-AAGORA serious game.

Atlantic-Arctic Ocean

Restore ecosystems & biodiversity

Baltic & North Sea

Carbon neutral & circular economy

Danube River

More protected & restored

Mediterranean Sea

Healthy & pollution free

DEM0-NO – ecosystem-based management to restore and secure biological diversity and to build climate resilience in and outside marine protected areas

Sustainable and circular solutions

Nature-based tourism

Restore kelp forests

DEM0-IE – develop community focussed coastal climate adaptation and resilience to embed ecosystem-based management practices and nature-based solutions

Coastal protection

biodiversity protection

Sand dune restoration

DEM0-PT – apply ecosystem-based management as a principle for managing and building climate resilience and the wealth of biodiversity, and to mitigate anthropogenic pressures

Coastal protection

Decarbonization
reduce GHG emissions

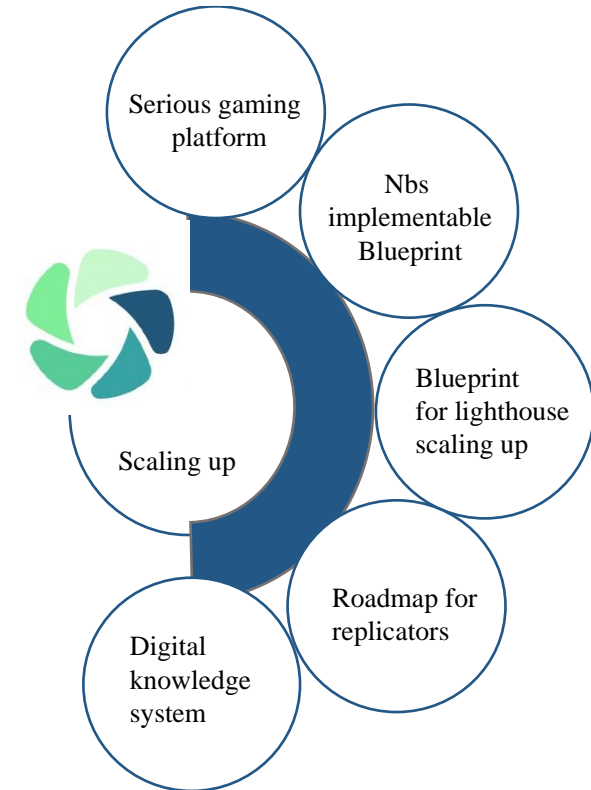

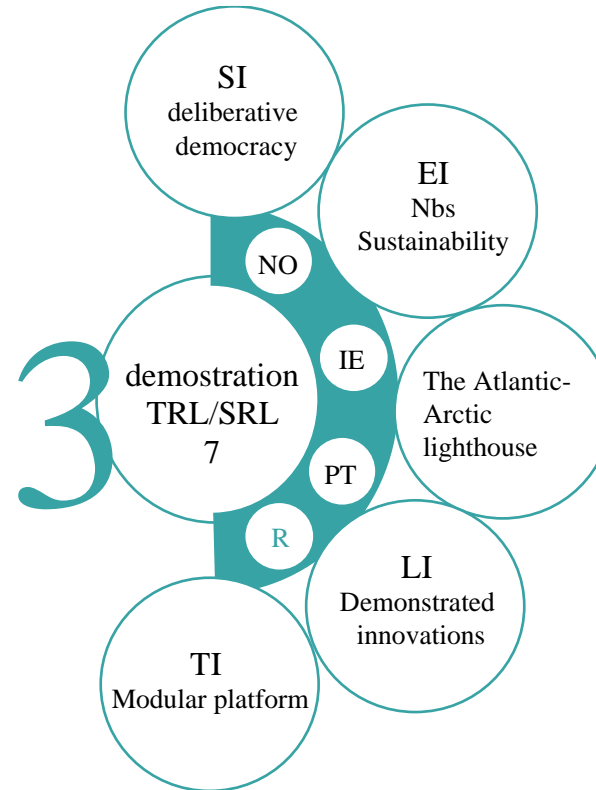

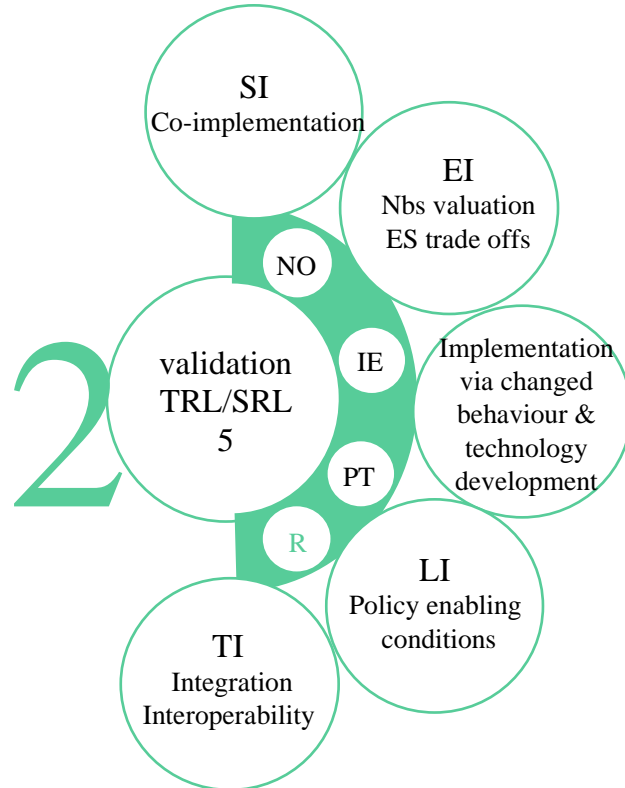

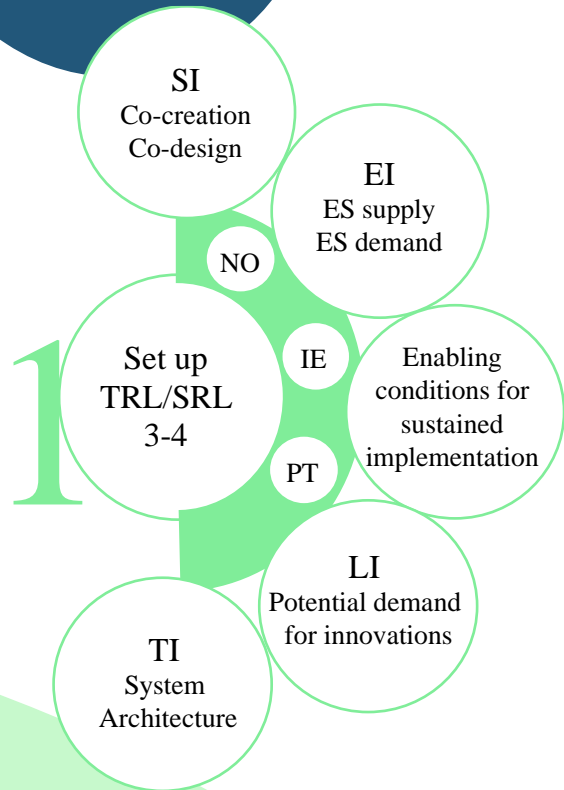

Restore seagrass

Nature based artificial substrate units for biodiversity restoration

the A-AAGORA timeline

Thank you!
